

Getting started

To get started, you need one thing:

- An API token (for Admins only) - you can find this by going to User Account → Personal Settings → API keys (at the bottom).

User Import/Update

It's important to post all users that you want active in Lanes & Planes, we assume that a missing user means we should deactivate the user.

The `POST` will always overwrite any data set manual in Lanes & Planes, the importing itself is asynchronous, but we provide a status page within Lanes & Planes where you can check for errors or see which changes did happen.

`PUT` and `REMOVE` are not in use.

Actual Request

POST to `/ext/users`

...

```
curl -X POST https://api.lanes-planes.com/ext/users \
-H 'Content-Type: application/json' \
-H "Accept: application/json" \
-H "Authorization: Token token=APIKEY" \
-d @users.json
....
```

```
``users.json
{
  "users": [
    {
      "ident": "1",
      "first_name": "User",
      "last_name": "Traveller",
      "email": "traveller@test.com",
      "abbreviation": "gk",
      "creditor_account": "12231",
      "company_creditor_account": "123123",
      "reference_cost_center": "12231231",
      "manager_email": "manager@test.com",
      or, for multiple managers
      "managers_emails": ["manager@test.com", "another.manager@test.com"],
      "personnel_number": "123",
      "cost_centers": [
        { "valid_from": "2022-01-01", "valid_until": "2022-12-31", "ident": "1231254", "name": "Human readable CostCenter
          name" }
      ],
      "accounting_invoice_profile_ids": [123, 1234]
    },
    { ... }
  ]
}
...

```

- * *ident* → personal identification number, which is given by the company / Persönliche Identifikationsnummer, welche vom Unternehmen vergeben wird
- * *abbreviation* ← → Namenskürzel
- * *creditor_account* ← → Kreditor Konto
- * *company_creditor_account* ← → Kreditor (Firmenkreditkarte)
- * *reference_cost_center* ← → Individuelle Kostenstelle
- * *personnel_number* ← → Personalnummer
